PROFESSIONAL SUMMARY

MBA candidate (Business Analytics) with proven experience in requirements gathering, process mapping, and BI reporting. At L&T, cut manual reporting by 80% via Power BI dashboards and reduced onboarding queries by 60% through structured SOP design. Skilled in gap analysis, stakeholder coordination, and translating operational data into decisions — backed by Python, SQL, and Tableau. Targeting Business / Operations Analyst roles across industries.

CORE SKILLS

Business Analysis: Requirements Gathering · Gap Analysis (As-Is/To-Be) · Process Mapping · SOP Development · Stakeholder Management · Business Documentation · Cross-functional Coordination

Analytics & BI: Power BI · Tableau · Advanced Excel (Pivot Tables, VLOOKUP, Macros) · KPI Reporting · Data-Driven Decision Support

Programming & Data: Python (Pandas, NumPy) · SQL · MySQL

Tools: ERP Systems (SAP S/4HANA) · Microsoft Office Suite · HTML/CSS

PROFESSIONAL EXPERIENCE

Larsen & Toubro (L&T) — Logistics Management Centre · Mumbai *Apr – Aug 2025*

Business Analyst Intern

- Gathered requirements from 6+ business unit teams to define KPI metrics and dashboard logic; built Power BI dashboards that cut manual reporting from 10 hrs to 2 hrs/week — an **80% reduction** delivered to senior management.
- Mapped the full purchase-to-payment workflow (requisition → order → shipment → invoice → approval) across multiple business units; identified reconciliation gaps and designed a validation checklist that measurably improved first-pass accuracy.
- Authored a role-based SOP consolidating 8+ fragmented reference documents into a single training-ready guide (step → action → expected output → error handling), reducing new-joiner onboarding queries by **~60%**.
- Conducted As-Is assessment of a warehouse hub model — mapped physical material flows against ERP entries, flagged mismatches, and led ERP training for warehouse staff, achieving full system readiness before go-live and saving **~2 hrs/day** in external support.
- Analysed spend data across 47 logistics vendors and 6 business units (₹2,985 lakhs total) — classified vendors by coverage and volume, identified consolidation opportunities, and presented gap analysis findings to management.
- Validated 150+ invoices across three invoice types (standard, change order, and legacy regularisation); built an exception log with categorised error codes that reduced vendor back-and-forth and accelerated approval turnaround.

Enjoy IT Solutions Ltd. · Mumbai *2023*

Web Developer Intern

- Analysed requirements and designed database schema for a food-waste management platform (HTML/CSS + MySQL) connecting donors with receivers — end-to-end delivery from requirements to a working relational backend.

Indian Women Scientists' Association (IWSA) · Mumbai *Nov 2024*

NGO Intern — Outreach & Coordination

- Coordinated science workshops for 80–100 students; co-managed logistics and stakeholder communications for the Golden Jubilee event with 100+ participants.

KEY PROJECTS

Logistics KPI Automation Dashboard | Power BI, Advanced Excel, ERP Data | L&T, 2025

- Replaced **10 hrs/week** of manual Excel reporting with real-time Power BI dashboards; defined KPI requirements with stakeholders, mapped ERP data fields, and iterated on design based on leadership feedback.

Vendor Performance & Spend Analysis | Excel, Power BI | L&T, 2025

- Structured analysis of 47 vendors across 6 business units (₹2,985 lakhs spend); produced gap analysis and consolidation recommendations adopted in management review.

Food Waste Management Platform | HTML, CSS, MySQL | Enjay IT, 2023

- Full-stack donor-receiver matching app — gathered requirements, modelled data, and built business logic automating end-to-end matching through a relational database backend.
